

JTLYK Year 2 01.02.19

Thank you once again to the parents who have talked to us about their adventures. This week we learnt about the Mekong Delta and the people who live there. The children had so many questions!

English

The children have been enjoying finding out about Arctic animals and writing their own fact files. We were amazed to find out that a polar bear's skin is black and that they can be as long as 2.5m!

Art

We learnt about Kenojuak Ashevak who was an Inuit artist. The children were inspired by her paintings of Arctic wildlife and created their own in her style.

International Visitors— February 6th (in school time) lots of students from Guildford College are visiting us to tell us all about different countries.

Bedtime Stories—February 13th 5:15pm—6pm. Children can come back to school in their dressing gowns, with a teddy, cosy blanket etc and join us in the classroom for stories and hot chocolate!

Times Tables Rock Stars

You may have seen on the newsletter about the exciting new online platform to assist with the learning of times tables at home. The resource, called Times Tables Rock Stars, can be accessed from any device with an internet browser. All of the children have been given a sticker in their JTLYKs with their personal login details. Please encourage your child to use this at home!

Maths

We have been continuing our work on telling the time and have also been calculating a quarter and three quarters of amounts. Perhaps ask the children to tell the time for you at home if you have an analogue clock.
